

## Medeco® Heavy Duty Tubular Deadlatch

Medeco is pleased to announce the addition of the 15 Series tubular deadlatch to complement our full line of high security deadbolts. The deadlatch features a 9/16" throw heavy duty deadlocking latch that prevents shimming or "loiding" the bolt with a credit card or similar tool. The deadlatch automatically deadlocks when the bolt enters the strike and is recommended for use on pool gates, security gates, and other applications where automatic locking is required.

### Features:

- Unitized assembly for 2 1/8" cross bore
- 9/16" throw stainless steel latch bolt
- 2 3/8" or 2 3/4" backset
- Exterior assembly with rotating security collar
- Single unit interior assembly with two 1/4" -20 mounting bolts
- Available with Medeco Biaxial® high security cylinders or KeyMark® SFIC core
- Meets or exceeds ANSI A156.5 Grade I specifications

### Installation

Completely reversible for left hand or right hand, standard or reverse bevel doors. Identical door preparation for all functions: standard 2 1/8" cross bore and 1" edge bore holes. Unit may be installed on doors from 1 5/8" to 2 1/4" thick.
