

## Introducing The Embassy™ 19 and 25 Series Electrically Locked/Unlocked Locksets

Medeco® Embassy 19 and 25 Series Electrically Locked/Unlocked Locksets incorporate Medeco's High Security and key control with the added flexibility and security of remote electrical control. Built into the lockset mechanism is a UL Listed solenoid which controls the lock function from a remote switch or access control system.

Embassy Electrified Locksets also incorporate the 19/25 Series Heavy Duty Cylindrical Locksets which conform to ANSI specifications A156.2, Series 4000, Grade 1.

### Applications

Ideal for high security applications that must also meet life safety codes, including: Stairwell doors, hospital equipment and narcotics areas, computer rooms, research and development areas, fire safety alarms.

### Electrical Requirements

100% Duty Cycle  
24vAC, supplied with Bridge Rectifier  
24vDC, .21 Amps
