

Maxum Deadbolt

With clean graceful lines, the Maxum deadbolt is as much a work of beauty as it is a symbol of strength. It features a clean, concealed hardware design that is at home on any door, but behind the beauty is the true essence of the lock. The residential Maxum incorporates every high security locking principle found in the legendary commercial version of the lock. With the highest quality materials and craftsmanship, this lock will provide protection and lasting beauty for generations.

Beautiful Design

The residential Maxum deadbolt began with the legendary Maxum commercial lock. By redesigning the solid brass outer components to fit the flowing lines of residential architecture, Medeco has created the perfect combination of beauty and strength.

Unmatched Security

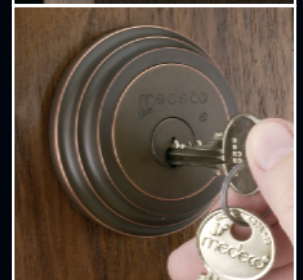

Behind its beauty, the Maxum is unapologetically a UL 437 rated, ANSI Grade 1 deadbolt, offering unmatched protection against unauthorized key duplication, picking, drilling, wrenching, kicking, or other physical abuse. A solid hardened steel bolt in heavy gauge steel housing provides maximum defense against physical attack.

Control Over Your Keys

The Maxum features a UL 437 rated cylinder for complete control over who can make a copy of your keys. With this protection you are assured of knowing exactly who has access to your possessions and loved ones. Additionally the Maxum, like all Medeco Residential locks can be masterkeyed for maximum flexibility.

Available In Many Styles & Finishes

The Maxum is available in single and double cylinder functions and in most popular finishes.

Specifications:

Solid brass construction.

UL 437 patented key and cylinder system.

Triple locking action makes lock virtually pickproof.
